WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print upside down on the wall tops, with support under the plate.

Plate 1.5 mm thick with the 46 x 24 mm display opening.

Walls 20 mm tall and 2 mm thick on both sides and the head end of the opening; the tail end is open toward the user.

Two clip legs 40 mm long, 2 mm thick, down both sides of the top shell; a lip on each leg snaps under the rib on the shell side.

Plate 68.4 mm across at the legs; legs 0.2 mm clear of the ribs.

Fit: press straight down until both lips click under the ribs. To take it off, spread the legs with the thumbs and lift.

Check: it does not lift when the scanner is shaken face down.
