WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print on its side (the 10 mm face on the bed), 100 % infill.

A bridge 10 mm wide: top bar 33 x 8 mm, two legs 4 mm thick and 14.75 mm tall, 29 mm apart between centres.

3.4 mm hole down through each leg and the bar.

Fit: the bar lies on top of the cell, 46 mm from the cell's spring end; the legs stand on the two strap bosses beside the cradle.

Two M3 x 25 low-head screws down through the strap into the inserts.

It holds the cell down in a drop: about 550 N at 1.3 times margin.

Check: the cell cannot lift and the screw heads are below 31 mm.

WASTEWISE SCAN
