WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print on its side (an 11 mm face on the bed), 100 % infill.
A bridge 11 mm wide: top bar 36 x 10 mm, two legs 4 mm thick and
15.25 mm tall, 29 mm apart between centres (fix F3).
3.4 mm hole down through each leg and the bar, with a 6.2 mm
counterbore 2 mm deep in the top for each screw head.
Fit: the bar lies on top of the cell, 46 mm from the cell's spring end;
the legs stand on the two strap bosses beside the cradle.
Two M3 x 25 low-head screws down through the strap into the inserts.
It holds the cell down in a drop: 870 N peak at 1.45 times margin.
Check: the cell cannot lift and the screw heads are below 31 mm.
